## Surface textures

The look and feel of real wood and stone

# Features guide

## Your benefits at a glance

Residential guarantee

All floors are put through a series of rigorous tests in order to comply with international quality standards, which is why we grant an extensive residential warranty with every product.

Real groove

Bevelled edges on all four sides of the plank ensure an authentic floorboard look.

Soft bevel

Inspired by traditional craftsmanship, the true-edge-bevels provide a harmonious room appearance.

Anti bacterial comfort

A.B.C. Anti Bacterial Comfort inhibits the growth of bacteria on your flooring and provides you with the peace of mind that comes from a healthy home environment. Tested germs: Staphylococcus aureus

Authentic embossed

The synchronous pores follow the grain of the decor, meaning they flawlessly mimic the character of natural wood.

Microscratch protect

The robust surface protects your flooring against micro-scratches that can be caused by strong mechanical stresses or the claws of house pets.

Pet-proof

Thanks to the robust surface, which is also undaunted by small mishaps, the flooring is exceptionally well-suited for life with house-pets.

Light-resistant

The flooring is light-resistant: Even on days when the sun is shining for hours, your flooring remains non-fading according to rating 6 of the Blue Wool Scale.

Silent

Due to an integrated pad, the flooring reduces impact sound, echoes and vibrations. An additional underlay is not required, which saves time and money.

Robust

This flooring is amazingly robust due to its super durable surface. Moving furniture or falling objects are not a problem because of its high pressure and impact resistance.

Warm underfoot

Due to its flexible design layer, the flooring has comfortable haptics and is warm underfoot.

Anti-slip class

Safety is something we put great emphasis on. Classification in anti-slip classes has been achieved through specially developed surface structures, which address the requirements for floor coverings in the workplace and commercial areas where a high risk of slipping is present.

Anti-slip class

Classification:  
R9 and R10 according to DIN 51130 and DIN EN 16165, A and B according to DIN 51097 and DIN EN 16165

Design diversity

Up to 60 different panels on digitally printed design are possible. This lends your flooring an authentic appearance that is virtually free of repetition.

Soft touch

The flooring has a soft surface and feels very comfortable.

Real wood

This floor is made from real wood. The high-quality brushed oak surface gives every room natural elegance.

Anti-static

The flooring provides complete protection against unpleasant shocks. The Anti-static is built-in and guaranteed for the life of the floor.

R150 Brenton

## The sustainable alternative to parquet

These wooden floorings are luxurious, cosy and natural. The high-quality brushed oak surface lends homely flair to any room. With the Veneer Parquet series, KRONOSPAN offers authentic wood floors with a real wood veneer as the top layer.

The special thing about it: KRONOSPAN combines the natural properties of the raw material wood with the technical refinements of a multi-layer construction. The top layer consists of a 0.6 millimeter wood veneer – the wood comes exclusively from sustainable forestry. The middle layer consists of a high-density fibreboard (HDF). This makes the flooring particularly stable and durable. Thanks to these properties, Veneer Parquet is a resource-saving and sustainable alternative to conventional parquet flooring.

The innovative feature, mo.re! technology, is the intelligent moisture protection. This means the real wooden surface of the floor is also protected for just in case.

# ROCKO

Flooring by Kronospan

## Waterproof SPC flooring with superior performance

### Innovative SPC floors with unique design

Waterproof Rocko Flooring, made of over 70 % of mineral core, finished with high-quality UV coating, is an outstanding material for domestic and commercial use, both in new projects and renovations.

### Appearance of natural wood & stone

Rocko Flooring designs are digitally printed, reflecting the smallest detail, the rich grain of wood and roughness of stones and concrete.

### Ensured stability

Rocko Flooring range is set apart from other types of vinyl flooring by its unique resilient core, which provides an incredibly stable base for each flooring plank and ensures dimensional stability, even with high temperature fluctuations.

## Coordinated solution

Available in 3 different formats, allows for any design finishing, going beyond the standard flooring frame. It comes with complementary accessories: waterproof flooring skirting boards, underlay and cleaning liquid for coordinated solution.

Check out the  
complete collection!

# A solid step up

R123 Nutmeg

# ROCKO

Flooring by Kronospan

## **Waterproof**

Rocko Flooring is suitable for indoor use in humid conditions, such as bathroom, laundry room, kitchen or vestibule.

## **Dimensional stability**

Rocko Flooring does not change its dimensions under the influence of temperature and humidity changes. It can be used in sunny and shaded areas as well as in dry and humid ones.

## **Utility class**

Due to its parameters, Rocko Flooring reaches the highest utility class. It can be used in intensively used domestic areas as corridor or kitchen, as well as in commercial spaces with high traffic, such as offices.

## **Underfloor heating**

Rocko Flooring is well suited for underfloor heating, thanks to its mineral content and its very good thermal conductivity parameters.

## **V-groove**

Real v-groove on 4 sides of each plank.

## How O.R.C.A. technology works

Each fiber is encapsulated with a special binder that prevents it from absorbing water.

Short fiber length and geometry reduces potential swelling.

Micro expansion on the edges seals the connection between planks.

## Wood's self sealing property

Wood expands when exposed to moisture and in doing so seals itself, preventing liquid penetration.

Boat builders take advantage of wood's natural self sealing property.

Wine barrels are still sealed using this time tested method.

**MOISTURE DEFENSE TECHNOLOGY**

## The floor that combines the best

**O.R.C.A. = Organic\*<sup>1</sup> Rigid Coreboard Abrasion-proof**

### **O.R.C.A. is twice as good**

It unites the best qualities of biologically based floors and conventional waterproof floor coverings. In O.R.C.A., organic\*<sup>1</sup> materials are made resistant to liquids by means of a special technology.

### **O.R.C.A. makes the flooring usable anywhere**

The innovative O.R.C.A. board makes it possible to install the flooring even in private bathrooms\*<sup>2</sup> where, until now, only vinyl or tiles could be used. Furthermore, thanks to their outstanding thermal stability and non-fading properties, O.R.C.A. products also can be used in conservatories and rooms with floor-to-ceiling windows.

### **O.R.C.A. floors are extremely robust**

The robust surface with an AC5 durability rating, protects the flooring against microscratches that can be caused by strong mechanical stresses such as moving furniture, falling objects or the claws of house pets. Thanks to its durable properties, which are also undaunted by small mishaps, O.R.C.A. floors are exceptionally well-suited for life with house pets.

### **O.R.C.A. is built better because it is more elaborately manufactured**

The wood fibers are mechanically processed multiple times in a special production process to obtain especially small fibers. Further on in the manufacturing process a specially developed, organic-chemical binding agent surrounds even the finest fibers and isolates them from moisture.

## The floor that's not afraid of water

### **100 h+ splash-water protection guaranteed\*<sup>3</sup>**

Little accidents occur almost daily. Wherever such things are bound to happen, it's worth relying on O.R.C.A. Kitchen, dining room, bathroom – O.R.C.A. is a perfect fit.

Scan the QR code and convince yourself!

\*<sup>1</sup> Consists of natural wood and an organic chemical binder

\*<sup>2</sup> Please observe installation instructions

\*<sup>3</sup> 24 h surface water protection as stipulated by NALFA (North American Laminate Floor Association) with additional 100 h+ surface water protection according to works standard specification KRONOSPAN WN-101, [www.100hour-test.com](http://www.100hour-test.com), up to 100 h no leakage based on ISO 4760:2022-05

**So reliable  
you can afford  
to take the plunge**

MOISTURE DEFENSE TECHNOLOGY

## The flooring that is naturally nature-friendly

[www.blauer-engel.de/uz176](http://www.blauer-engel.de/uz176)

### Sustainable

Sustainability isn't just a buzzword for us, but part of our corporate strategy. It would never cross our minds to use wood that didn't come from sustainably managed forests.

### CO<sub>2</sub>-negative

O.R.C.A. boards are CO<sub>2</sub>-negative because manufacturing O.R.C.A. releases less CO<sub>2</sub> than was stored by the tree.

### Organic

Our O.R.C.A. board consists of components based on biological raw materials and organic-chemical binding agents (synthetic resins) and thus is organic.

### PVC-free

Our O.R.C.A. products contain no PVC\*.

\* May contain traces of PVC, e.g. from packaging

## Laminate Flooring Take more. Endure more. Withstand more.

mo.re! from KRONOSPAN is a moisture-resistant laminate flooring product that makes laminate even more practical for everyday life.

**mo.re!** makes laminate flooring even more moisture-resistant. And that's a good thing. After all, small everyday mishaps can happen to anyone.

## How mo.re! technology works

**mo.re! is based on a specially developed substrate formula.**

Its new binding agent makes the flooring more durable and decreases swelling – improving resistance to moisture penetration.

Scan the QR code and check out the mo.re! features!

\* 24 h surface water protection as stipulated by NALFA and 48 h splash-water protection according to works standard KRONOSPAN WN-103, [www.floor-with-more.com](http://www.floor-with-more.com)

**Your floor  
can do mo.re!**

K476 Inca Carpenter Oak

mo.re! can  
stand up to  
what life brings

[www.blauer-engel.de/uz176](http://www.blauer-engel.de/uz176)

It is **much more moisture-resistant** than traditional laminate flooring

It is **A.B.C. surface**\* inhibits bacteria growth on floors to protect your family

It is **light-resistant**: Even on days when the sun is shining for hours, your flooring remains nonfading according to rating 6 of the Blue Wool Scale.

It is **perfect for life with house pets** – the robust and hard-wearing surface masters the everyday challenges of households with pets

It is great for **installation in private bathrooms**\*\*

It is available in **utilization classes 32 and 33** according to DIN EN 13329

\* Tested germs: Staphylococcus aureus \*\* Please refer to the installation instructions

K326 Sundance Oak

## mo.re! for the environment

### mo.re! offers more, even for the environment

It is made using only wood from sustainably managed forests. And KRONOSPAN does not use any PVC in flooring with the mo.re! technology. This demonstrates our commitment to environmental stewardship. mo.re! substrate is CO<sub>2</sub>-negative: Processing a tree to make this product emits less CO<sub>2</sub> than the tree has stored in its life.

\* May contain traces of PVC, e.g. from packaging

LAMINATE  
FLOORING

## Give your surroundings a unique flair

Laminate enjoys a fantastic reputation as an absolute all-rounder. There is hardly an area or room that is not suitable for its installation. Whether children's rooms or living rooms, offices or shops, with or without pets – laminate flooring is a beautiful and uncomplicated partner thanks to its robustness and durability.

The list of advantages of laminate flooring is long – easy to clean and therefore hygienic, anti bacterial thanks to surface structures that bacteria cannot adhere to, light-resistant and hard-wearing. Last but not least, there is the range of decors and surfaces, that leave nothing to be desired.

## Authenticity you can see and feel

**Very close to the original – these are laminate decors, whose appearance is made up of two factors – image and surface.**

Color and light form the symbiosis for a perfect reproduction of wood, stone and tiles. And the perfect optical representation is complemented by the tactile reproduction. Vision and touch, the interaction of the senses.

LAMINATE  
FLOORING

## Favourite for everyday living

[www.blauer-engel.de/uz176](http://www.blauer-engel.de/uz176)

### Easy to install

The sophisticated KronoOriginal® click systems make installation child's play. The prerequisite is good preparation – having all panel materials, accessories and tools at the ready, as well as planning with the help of the checklist and the appropriate instructions.

### The floor for every requirement

An important factor when choosing a laminate floor is the utility class. The more a room is frequented and therefore the floor is challenged, the higher the usage class has to be. The utility class describes the possible stress on the entire panel and thus indicates whether the flooring is recommended mainly for private or also for commercial use. This consideration is important regarding to the warranty conditions.

#### Utilization class 32 (EN 13329)

Suitable for heavy domestic and medium commercial use

5966 Khaki Oak

### Healthy living

A.B.C. – Anti Bacterial Comfort ensures that bacteria\*<sup>1</sup>, dust mites and microbes have no chance of settling on them. This makes cleaning the laminate flooring easier and quicker and therefore particularly hygienic.

Healthy living also means that additives such as PVC\*<sup>2</sup>, chloride or wood preservatives are not used and can therefore neither trigger nor intensify allergies.

### Sustainable

Laminate flooring consists of around 90 percent natural wood, which comes exclusively from sustainably managed forestry. This is guaranteed by the PEFC certificate.

Generally, all production processes are low-emission and therefore sustainable.

<sup>\*1</sup> Tested germs: Staphylococcus aureus  
<sup>\*2</sup> May contain traces of PVC, e.g. from packaging

## Accessories that match your floor perfectly

### Selected range of products

Every floor needs proper accessories. We can supply you with the ideal equipment for all types of flooring. One contact, one supplier – which makes everything so much simpler for you.

### Underlays

Depending on the situation in the room, attention must be paid to the correct underlay material when installing the flooring. For this we offer multiple solutions.

### Skirting boards

Choose from a range of skirtings in various decors that match all KronoOriginal® floors. Our advanced fixing system makes it quick and simple to achieve a perfect installation.

### Additional accessories

If you still look for the proper skirting board, corner pieces, aluminium adhesive tape for sealing or you are done and wish to mop the floor, take a look at the following pages and discover the wide range of accessories.

## All under one roof

**Our guidance system shows the matching products for different types of floor.**

**Veneer Parquet**

**Organic VENEER PARQUET:**  
Height: 8.5 mm

**SPC Flooring**

**SPC flooring:**  
Height: 5 mm and 5+1 mm, including silent pad, floating installation

**O.R.C.A. Flooring**

**O.R.C.A. flooring:**  
Height: 6+1, 7 and 8 mm, organic rigid coreboard, floating installation

**Laminate Flooring**

**Laminate flooring:**  
Height: 8, 10 and 12 mm
