

# TEXTILE DIVISION

## / EOC GROUP WORLDWIDE PARTNER FOR SUSTAINABLE CHEMISTRY

EOC Group is a family-owned producer of chemical products with headquarters located in Belgium. Our product portfolio extends from compounds and latices to adhesives, emulsions, surfactants, technical textile chemicals, TPE and polyurethanes. With a focus on sustainable entrepreneurship, we aim to produce high-quality products providing excellent service to our customers.

13 production sites

700 people

worldwide supplier

## / EOC TEXTILE DIVISION

EOC started in 1948 as a producer of foam rubber for mattresses and switched in the early 60s to compounds for the carpet industry. Today, as a group we are active in a wide variety of markets, but our history shows that the roots of our company lie in our textile division.

We partner up with new and long-time customers in the continuous search for innovation and improvement in textile backing solutions. We go far beyond the production of raw materials. We share our know-how in the textile market, offering customized solutions, technical assistance, and chemical regulation support.

## / TEXTILE BACKING SOLUTIONS

Our product portfolio offers different systems according to your requirements.

<b>Water-based systems</b>	<p><b>Binders</b> xSB, (S)ACR, SBR / NL, EVA, PVDC, Polyolefin dispersion, PVB dispersion</p> <p><b>Compounds</b> Mixture based on binder with additions of filler and/or functional additives</p> <p><b>Auxiliaries</b> Functional additives</p>
<b>Reactive systems</b>	<p><b>Polyurethanes</b> Reactive system of polyol and isocyanate (MDI)</p>
<b>Solid systems</b>	<p><b>Thermoplastic elastomers</b> Mixture of remeltable polymers with additives</p>

## / PARTNERSHIP IN EVERY STEP

We are a one-stop-shop for textile backing solutions and aim for a long-term partnership in every step of the process.

### Analyzing your needs

Each project starts with an in-depth analysis of your needs, mapping out the functionalities, technologies and the goals.

Based on this analysis, a team of EOC researchers are put together with the appropriate expertise to manage your project.

### Study, engineering & sampling

We offer tailor-made solutions and standardized products compliant with all regulations, legislation and standards to ensure a suitable backing solution. Whether it is a minimal adjustment to an existing recipe or a completely new development, for both you can rely on an experienced team of R&D experts. With our in-house test equipment, we can deliver the necessary sampling.

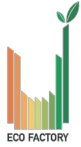

### Rollout and standardization in the production process

The conversion of in-lab development to the industrial application requires the necessary expertise and support.

Our technical application engineers participate in the industrial tests at your production site and optimize the process until the project is ready for commercial success.

EOC & sustainable entrepreneurship:

## / OUR STRENGTHS

### Reliable distribution

In-house logistic fleet (90 tankers) for deliveries throughout Europe and a network of reliable forwarders for long-distance haulage and oversea transport (samples, IBCs, full trucks, sea container load).

### Transparent communication

A personal approach with transparent and clear-cut communication. In close cooperation with the production, logistics and sales department, our customer service team handles your order with care from order entry to delivery.

### Sustainable entrepreneurship Because we care

In everything we undertake, our wish is to do things sustainably. We are committed to the 17 UN Sustainable Development Goals. Our R&D experts strive to search for sustainable raw materials and processes to offer alternatives to our customers.
