Cobalt classics reinvented

Cobalt SDN is the mother of all our products, a starting point to mix and match with other collections in our range. Cobalt SDN offers **28 striking colours**, from classy neutrals to on-trend funky shades. The choice is yours! Give your creativity free reign and combine colours and designs to your heart's content.

The Cobalt series expands with **six brand-new loop pile designs** that match perfectly thanks to their shared colour palette. From concrete to honeycomb and wood texture, the collections are inspired by **contemporary patterns and natural materials**. The result? A range of floor concepts that allow you to make a statement. The tasteful look of **Hexagon Art, Grunge, Relined, Expression and Crossline** bring a unique dynamic to any space. The **Cobalt Creations** transition tiles enable interior designers to create dramatic **colour transitions** when furnishing modern offices, hotels or public spaces.

Mix and match these new collections with the solid colours from Cobalt SDN or create a truly artistic floor by blending multiple textures and shades. Tapibel offers a solution that brings personality to every space!

We do not compromise on **quality** and **service**. The Cobalt Design Collections are made of **durable PA6 SDN** ("Solution Dyed Nylon") yarns that meet all project standards. High-quality materials promote the user's **wellbeing** and **productivity**; good underfoot comfort and impressive acoustics are just some of the benefits. A well-balanced design contributes to the overall feeling of a room. This makes our concept ideal for your next construction and renovation projects.

Standard stock, fast-track or custom made flooring solutions

Our design collections are standard available in **4 metres width action back rolls** and **50x50 cm Greenbase modified bitumen carpet tiles**. This makes Tapibel's offer unique in the market!

We understand that stock or fast-track service is key in the contract market. Some clients however may prefer something that stands out! **Carpet planks** (25x100 cm) are available as from 100 m² per colour. **Larger tiles** (50x100 cm, 100x100 cm and 100x200 cm) are optional as from 200 m² per colour onwards. For improved acoustics and a higher level of comfort, we offer a **premium SoundBloc** tile backing for projects exceeding 200 m². And last but not least, you can now explore the bespoke options of our **Cobalt Colour Concept** for projects of minimum 400 m². More detailed info on page 88.

COBALT CREATIONS

 50x50 cm

Cobalt Creations is a brand new modular concept, designed to create playful colour transitions. That way we're ensuring dynamic floors in every commercial or hospitality interior. With 11 colour options that blend seamlessly together with Cobalt SDN, Creations adds diversity from a multitude of installation design options. Transitioning from one zoned area to another is now possible without the use of hard lines.

INSTALLATION METHODS

Multitude of installation design options

Another unique feature of this collection is its multitude of installation design options. Our transition tiles are produced in a specific way. As a result, every box of 20 tiles will hold 2 types of tiles: a regular one and its “mirror version”. Once you turn the “mirror tile” 180 degrees, it will create a continued transition with the regular tile.

Interior designers can work freely with our transition tiles, creating any dynamic floor layout for modern office or hospitality interiors.

Each carpet tile shows an arrow (pile direction) and an A-B-C-D mark on the backside. Every Cobalt Creations box with a total of 20 tiles (5 m²) carries a mix of these 4 types. Before or during installation works, you can plan the best layout based on pile direction and combinations of A-B-C-D tiles according to the floor plan.

Cobalt Colour Concept

28 Cobalt colours to create from

Cobalt Colour Concept

At Tapibel, we love a creative challenge and we like to stimulate your imagination. Do you want to create a truly unique floor? Then you have to look beyond our stock collections.

Our brand new Cobalt Colour Concept is sure to fire up your creativity. For projects of over **400 m²**, we can customise any dazzling floor:

- Step 1:** Choose the desired design from our Cobalt Design or ECONYL® Design Collections.
- Step 2:** Choose the two Cobalt SDN colours from our 28 available options.
- Step 3:** Order your customised sample.

Twise: sustainable initiatives for a greener planet

T W I S E

Our carpets and our approach fit into today's world, as we are committed to ecology and sustainability. We are always looking for ways to make our carpets and carpet production more sustainable and ecological. We make this promise a reality with concrete **ecological solutions for a more sustainable modus operandi.**

Discover Twise, Tapibel's sustainability brand.

Why Twise?

1. Tapibel is "wise" to produce greener carpets.
2. All sustainable solutions contain recyclable material. We give it a second (and third, fourth, ...) life.

The result?

A more sustainable and ecological carpet, from the yarn to the backing.

As a family business, we also think of the next generations. Thanks to these adjustments, they too can enjoy a greener world and greener carpet.

Ecofuse

The adhesive

Ecofuse is our **ecological alternative to the traditional latex adhesive** compound in both wall-to-wall carpet and carpet tiles. We replace the latex by a sustainable, post-consumer product called PVB (PolyVinyl Butyral), extracted from used car windows and laminated building glass.

The benefits

of sustainable origin

non-toxic

future-proof

The switch to PVB results
in a latex reduction of
500 tonnes!

Scan the QR code
and discover the PVB
production process!

Ecofuse in our carpets

At Tapibel, we use Ecofuse in many of our carpets. Both in broadloom and in carpet tile.

Precoat

The first adhesive layer between yarn and primary backing, to ensure that the yarns bond firmly.

Secondary backing

A second adhesive layer is applied to glue the action or felt backing onto the actual carpet. This final process ensures that the broadloom carpet obtains more body and rigidity.

Greenbase

The modified bitumen backing

1

Yarn

2

Precoat
Ecofuse

3

Greenbase

4

Cover sheet

Greenbase, short for modified bitumen, is a more sustainable solution for carpet tile backing. It consists of **70% recycled materials** (diverted from a waste stream of the limestone mining), which makes it less harmful to the planet. Greenbase guarantees both dimensional stability and strength in the final product.
