**Transforming the past to
build the future:
used carpet from waste to
precious resource**

ECOMONDO
The green technology expo.

From temporary event flooring to timeless furnishings: used carpet takes on new life to enhance events, exhibitions and more.

The future of events is in the reuse: the carpet that normally have a short life, today finds a new purpose through recycling. With 100% recyclable carpets and ISO 20121-certified services, Alma provides sustainable solutions that respect the environment, while preserving the unique details that make each event special.

Starting from used carpet we obtain recycled polypropylene granules, colourful and versatile, perfect as a raw material for new solutions in multiple sectors.

Our design furnishings are proof of that! Made from our recycled carpet, they are a concrete example of circular economy.

Each piece tells a story of rebirth and new opportunities.

From the carpet production to its reuse

01 Staple fiber

02 Carpet in production

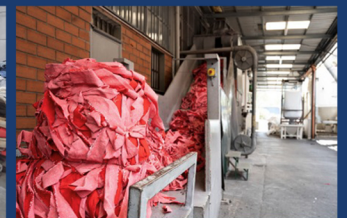

03 Carpet roll

04 Carpet installation

05 Carpet collection post-event

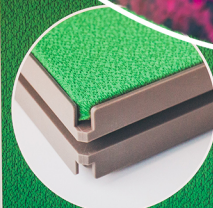

06 Carpet recycling

Re-think the style with used carpet

Our mission goes beyond! Through our upcycling project we tell the carpet's journey, from the end of the event to an original design furnishing: the pouf. Comfy and functional, our pouf is ideal to decorate and bring colour to events. It perfectly fits any space, both indoor and outdoor. Each pouf brings a special design and an original touch.

Change its look to last over time

We've recycled the carpet from previous Bologna Fiere events to design the Corner Relax By Alma and Monoto with a fresh new siblo. HAVE A SEAT! It's comfortable even when transformed into seating.
